

3145 GM SIDE TERMINAL BATTERY WRENCH - 5/16"
Removes and replaces 5/16" hex GM side terminal battery bolts. Reversible ratcheting box wrench design with insulated handle to prevent shock. OAL: 5" (127mm)

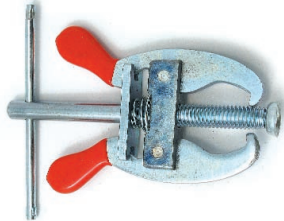

3147 EXTRA LONG BATTERY WRENCH - 5/16"
9-1/2" (24cm) long wrench offers extra reach for hard-to-access applications. 5/16" hex reversible ratcheting design allows for quick and easy terminal bolt removal. Vinyl grip protects against electrical shock. Applications include Pontiac Grand Am, Grand Prix & Transport, Chevy Lumina APV & Monte Carlo, Oldsmobile Silhouette & Cutlass, Ford Aerostar Van, Buick Regal & Century and GM "W" Body.

3149 SIDE TERMINAL BATTERY WRENCH - 10MM
6 point metric wrench services many imports and domestic (except GM) vehicles. 10mm hex reversible ratcheting design allows for quick and easy terminal bolt removal. Vinyl grip protects against electrical shock. OAL: 5-1/2" (140mm)

3130 HEAVY-DUTY BATTERY TERMINAL PULLER
Heavy-duty tool is build for removing the most corroded clamps. Jaws are thick gauge steel with sharp ends and center screw handles high torque requirements. Strong enough to double as a small gear puller.

A330 BATTERY TERMINAL PULLER
For basic battery terminal removal jobs, this tool is spring-loaded and features vinyl ends for comfortable grip.

3125 BATTERY TERMINAL SPREADER & CLEANER
Clean and spread terminals in one operation with this pliers-type tool. Sharp milled teeth for effective cleaning. Die-cast construction with vinyl grips. OAL: 7" (178mm)

3135 BATTERY NUT PLIERS
Offset head and sharp milled teeth will service any stubborn battery nut. Die-cast construction with vinyl grips. OAL: 8" (203mm)

3110 BATTERY CARRIER
Two-jaws, with serrated teeth, "scissorlock" onto battery to grab, lift and carry. Thick, rubberized handle is riveted to jaws. Works on both side-terminal and top-post batteries.

A339 BATTERY CARRIER STRAP
12" (30cm) vinyl strap is riveted to special ends to fit all 6 and 12 volt top terminal batteries.

A340 2 PC. HEAVY-DUTY BATTERY CLAMP SET

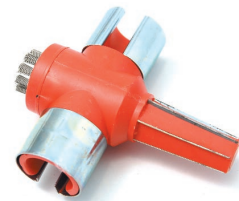

Set of heavy-duty clamps allows easy repair of your jumper cables if a clamp is broken. Solid copper connectors rated at 400 amps.

**3150 FLUID TRANSFER TOOL**

Resistant to automotive fluids, this bulb-type tool is useful for emptying brake master cylinder reservoirs during fluid service, adjusting the level of electrolyte in batteries, cleaning out carburetor bowls, etc. Large, long-lasting rubber bulb and 6" long, rigid plastic nozzle.

**3120 4-WAY BATTERY TERMINAL CLEANER**

Handiest battery service tool available, this will remove corrosion from battery clamps and posts. One end is marked for positive posts, one end for negative posts, one for clamps, and brush on top for cleaning battery terminals. Four-way design fits hand perfectly.

**3115 BATTERY BRUSH (PLASTIC CASE)**

Cleans battery terminals and posts. Internal and external wire brushes are built into special acid-proof plastic case.

**A337 BATTERY BRUSH (METAL CASE)**

Cleans battery terminals and posts. Internal and external wire brushes are built into metal case.

**A338 SIDE TERMINAL BATTERY BRUSH**

Easily cleans terminals on side terminal batteries. One side designed to clean recessed terminals, other side cleans cable bolts and connectors. Comfortable plastic handle has built-in hex hole.

**8700 RATCHETING CABLE CUTTER**

Cuts copper and aluminum cables up to 32mm (1-1/4") diameter. Hardened steel blades ensure consistent cuts and long term durability. Rounded blade design minimizes cable distortion during cutting. Quick release mechanism simplifies blade back-out. Ergonomic, non-slip handles lock for easy and safe storage. Blade is replaceable.
